

For parents of the child aged 25-60 months

B6 Child development

Instructions for interviewer

Explain to the primary caregiver that the following questions are about the child's ability and child behavior in the past 12 months.

The primary caregiver needs to listen carefully and considers how frequently the following behaviors occur.

Show the cards about frequency, which are categorized in 4 scales as follows:

- 5 Unusually
- 3 Sometimes
- 1 Unable
- 0 Not encounter

"Not encounter" means that the situation has never happened in the past 12 months.

Mark the sign X on the number representing the frequency of each item in Table 1.

Information for parents before asking the questions:

The following questions are about activities and expressions of children with wide range of ages.

If the child has not reached a specific age, he/she may be unable to do a particular activity or to have a particular expression.

Therefore, parents do not need to be worried if their child is unable to do some activities or have some expressions.

1) Is the child capable of doing the following activities?
