

A8 Household expenses on consumption

Explanation For A-B, in case the respondent answers in term of per month, divide the answer by 4.3 and then record the answer in Table.

In case the cost of 2 items cannot be separated, record the codes of both items in the "not separatable" column and specify the values of 2 items equally.

Example: Expenses on alcohol and cigarettes are 2000 Baht per month, record as follows:

Code	Items	Note	Not separatable	Purchase	Produce	Received	Frequency
C	Alcoholic beverages	Expenses on alcohol and cigarettes 2000 Baht per month	C,D	2000	0	0	month
D	Tobacco, cigarettes		C,D	2000	0	0	month

Ask HC1-HC3 about household consumption in an ordinary month and record in Table 1.

HC1: How much does the household buy or consume these items? (In case of no consumption, record "0")

HC2: HC2: How much does the household produce these items? (In case of not produce/receive, record "0") Excluding consumption of product/goods in business and livestock sections

HC3: How much does the household receive these items? (In case of not received, record "0") Excluding consumption of product/goods in business and livestock sections
