Unique Missing Values: There are four types of missing values .a or RF: The subject explicitly refused to answer the question when he or she should have. .b or NA: The subject was never asked the question for one reason or another. Usually this results from "skip patterns" that occur. .c or DK: The subject was unable to answer the question either because he or she had no opinion or because the required information was not available. .d or MI: Items should be filled out but have no data entry found. This is enumerator's own mistake. The circumstances can be interviewers failing to ask a question or forgetting to record a response Numeric Missing\*: String Missing\*: RF .a .b NA .c DK .d ΜT children id cid type: string (str18) unique values: 1,434 missing "": 0/1,434 "201591160419002H7" examples: "201593121510202H4" "201691150908055H1" "201691161706126H1" iyear year type: string (str4) unique values: 2 missing "": 0/1,434 tabulation: Freq.
