

## A8 Household expenses on consumption

Explanation For A-B, in case the respondent answers in term of per month, divide the answer by 4.3 and then record the answer in the Table.

In case the cost of 2 items cannot be separated, record the codes of both items in the "not separatable" column and specify the values of 2 items equally.

Example: Expenses on alcohol and cigarettes are 2000 Baht per month, record as follows:

Code	Items	Note	Not separatable	Purchase	Produce	Received	Frequency
C	Alcoholic beverages	Expenditures on alcohol and cigarettes 2000 baht per	C,D	2000	0	0	month
D	Tobacco, cigarettes		C,D	2000	0	0	month

Ask HC1-HC3 about household consumption in an ordinary month and record in Table 1.

HC1: How much does the household buy or consume these items? (In case of no consumption, record "0" )

HC2: How much does the household produce these items? (In case of not produce/receive, record "0") Excluding consumption of product/goods in business and livestock sections

HC3: How much does the household receive these items? (In case of not receiving, record "0" ) Excluding consumption of product/goods in business and livestock sections

Table 1 A8\_table1

no	id	description		HC0	HC1	HC2	HC3	freq
#	Code	Items	Note	Not separatable	Purchase	Produce	Receive	Frequency
1	A	Rice, glutinous rice, flour, product from flour						week
2	B	Expenses on food, non-alcoholic beverages						week
3	C	Alcoholic beverages						month
