DATA HAVE CHANGED SINCE LAST SAVED

```

```

Label: [none]
Number of variables: 64
Number of observations: 12,328
Size: 48,214,808 bytes ignoring labels, etc.
Unique Values: A list of all of the possible non-missing values
for the variable and the description of the values.
Unique Missing Values: There are four types of missing values

```

```

.a or RF: The subject explicitly refused to answer the question
when he or she should have.
.b or NA: The subject was never asked the question
for one reason or another. Usually this results
from "skip patterns" that occur.
.c or DK: The subject was unable to answer the question
either because he or she had no opinion or because
the required information was not available.
.d or MI: Items should be filled out but have no data entry found.
This is enumerator's own mistake. The circumstances
can be interviewers failing to ask a question
or forgetting to record a response

```

```

Numeric Missing*: .a String Missing*: RF
                  .b                      NA
