```

> a
Dataset: Z:\RIECE DATA\RIECE_RELEASE V3-2017-2018/codebook\b1a1_run.dt
Last saved: 3 Oct 2024 13:36
DATA HAVE CHANGED SINCE LAST SAVED

```

```

Label: [none]
Number of variables: 32
Number of observations: 662
Size: 322,394 bytes ignoring labels, etc.
Unique Values: A list of all of the possible non-missing values
for the variable and the description of the values.
Unique Missing Values: There are four types of missing values

```

- .a or RF: The subject explicitly refused to answer the question when he or she should have.
- .b or NA: The subject was never asked the question for one reason or another. Usually this results from "skip patterns" that occur.
- .c or DK: The subject was unable to answer the question either because he or she had no opinion or because the required information was not available.
- .d or MI: Items should be filled out but have no data entry found. This is enumerator's own mistake. The circumstances can be interviewers failing to ask a question or forgetting to record a response

```

Numeric Missing*: .a String Missing*: RF
                  .b                      NA
                  .c                      DK
                  .d                      MI
