```

Dataset: \RIECE_RELEASE V3-2017-2018/codebook\b10_run.dta
Last saved: 13 Feb 2026 16:41
    
```

```

Label: [none]
Number of variables: 31
Number of observations: 1,510
Size: 2,856,920 bytes ignoring labels, etc.
Unique Values: A list of all of the possible non-missing values
for the variable and the description of the values.
Unique Missing Values: There are four types of missing values
    
```

- .a or -6 or RF: The subject explicitly refused to answer the question when he or she should have.
- .b or -7 or NA: The subject was never asked the question for one reason or another. Usually this results from "skip patterns" that occur.
- .c or -8 or DK: The subject was unable to answer the question either because he or she had no opinion or because the required information was not available.
- .d or -9 or MI: Items should be filled out but have no data entry found. This is enumerator's own mistake. The circumstances can be interviewers failing to ask a question or forgetting to record a response

```

Numeric Missing*: .a or -6
                  .b or -7
                  .c or -8
                  .d or -9
String Missing*:  RF
                  NA
                  DK
                  MI
    
```
